

*Golf is the best sport,
but it needs practice
to hit good shots.*

Scientific practice with SMARTGOLF

On a golf course with clear skies and panoramic views, it takes practice to hit great shots, and enjoy golf with your friends.

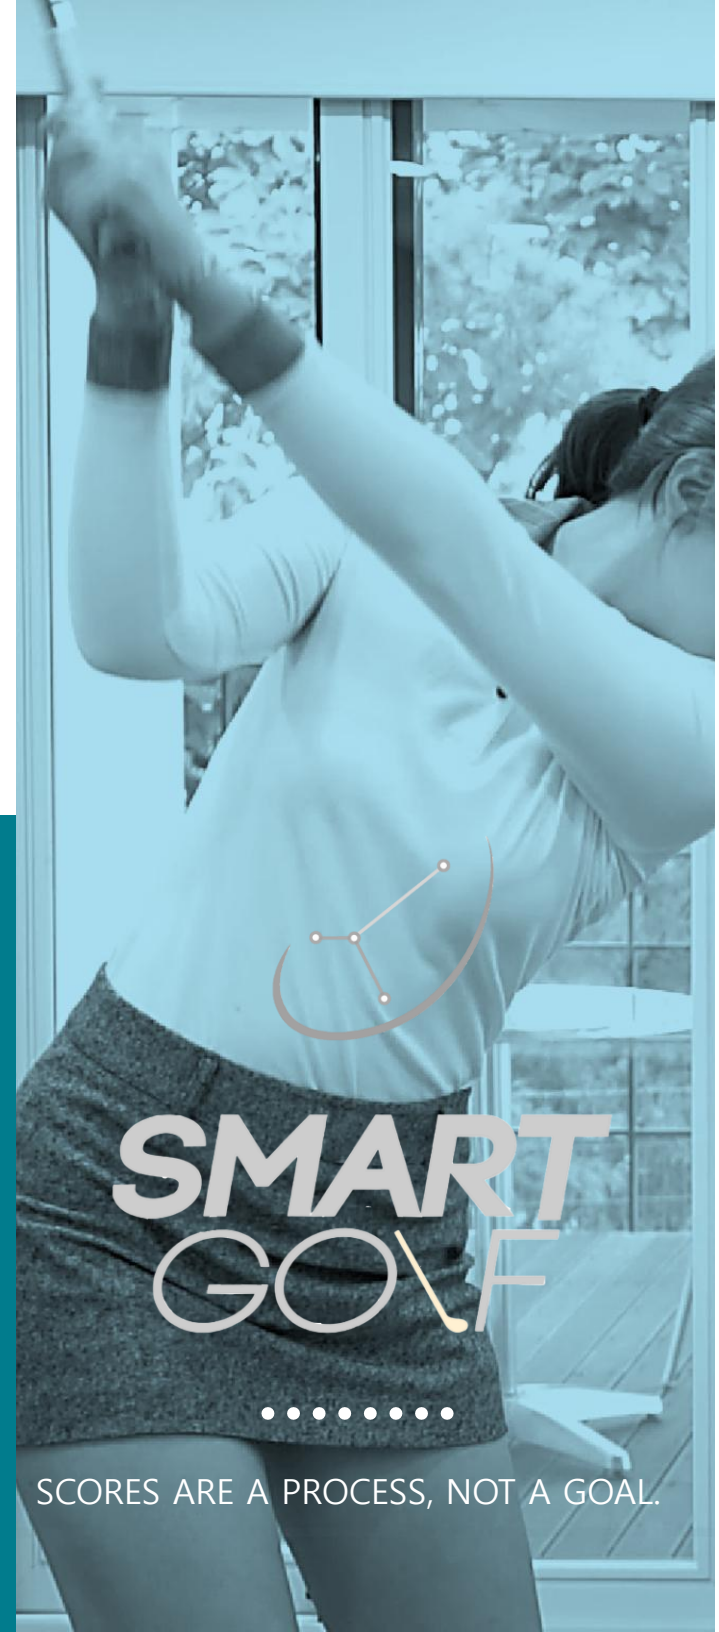

To make swing practice easier and more convenient, scientific golf training tool is required, and SMARTGOLF AIX allows you to swing unlimited availability

SCORES ARE A PROCESS, NOT A GOAL.

Be the Master of your own practice.

A good coach can teach you golf swing with his fame and rich experience in his heyday, but each person's physical characteristics are different, so you have to find a coach that suits you.

Even with expensive coaching, you have to practice to improve your swing

Now that SMARTGOLF has mathematically revealed the swing principles of golf, people can analyze and train more scientifically

Even if you swing alone, the app analyzes it, briefly informs you of the most wrong points, and coaches you on how to improve it.

You can practice on your own by following specific guidance from the app with A.I.

The sound of straps complementing the short club length is applied with patented physical principles that come out when the right swing is made

SCIENTIFIC ANALYSIS AND COACHING

Golf is no longer just a symbol of the older affluent. Golf is the 1st sport that people that young millennials want to learn.

Golf practice needs to be scientific and systematized for the digital generation. You can practice and improve your skills conveniently by yourself with automatic analysis and coaching in the app and system rather than the traditional experience-oriented coaching.

PERHAPS THE
BEST SWING IS
THE ONE YOU'VE
INTENDED,
UNDERSTOOD,
AND PRACTICED.

SMARTGOLF ELABORATES IT.

Existing swing analyzers and simulators only show data at the impact section or simulate the trajectory of the ball for a price range of tens of thousands of dollars. Data at the moment of impact is important, but not enough.

To improve your swing, you need more information, not the result of a hit or miss. In particular, to improve the swing through the correlation of such information, it is necessary to understand the mechanism of the swing..

AI ALGORITHM

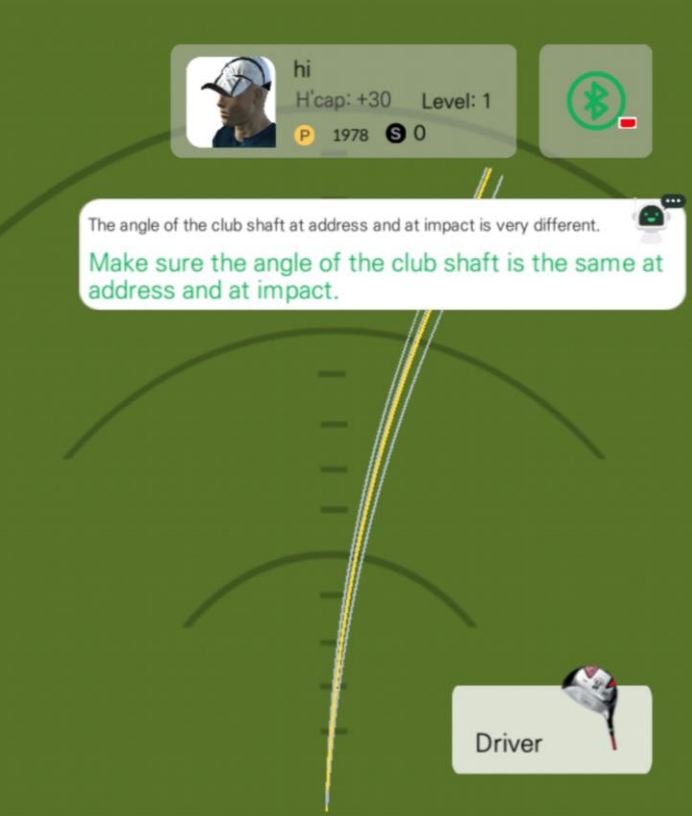

SMARTGOLF is analyzing the entire swing section by applying a scientific algorithm. In addition, AI swing posture analysis is performed through machine learning, and SMARTGOLF's ML algorithm provides indications and solutions for the most problematic indicators in this swing.

ONLY SCIENCE ADVANCES THE
WORLD.

3D REPRESENTATION AND AI ANALYSIS

- The avatar swing of the app that recreates the free movement of the club at the same time
- The entire swing area and impact section are expressed and reproduced in 3D.
- Individual and comprehensive analysis display with 3D manner along the time axis by machine learning

BE THE MASTER OF YOUR OWN TRAINING.

No matter how good a teacher and training method are, your body is your own and your golf swing is also yours. Therefore, swing analysis after swing is automatically executed, and being able to know whether or not your swing has improved is an important tool and method for self-learning. Sometimes you learn from a good teacher, but the process of swinging alone so that you can always practice, changing your form and comparing yourself according to the results of **AI coaching** is a new paradigm in golf practice.

Now, get away from the anxious swing practice of whether this is right or not, and become the master of golf swing training yourself.

IMPROVING YOUR SKILLS with SMARTGOLF

SMARTGOLF mathematically elucidates the golf swing algorithm so that anyone can clearly understand it. Scientific swing analysis is performed by analyzing 3 circular motions and 1 linear motion, and also scientifically analyzing your swing problems through the camera. With full explanations of these physical algorithms and video tutorials for each part to follow, you can easily improve your golfing skills.

Improve your golf skills by understanding the fundamental interpretation of problems related to swing distance and direction as well as swing repetition with SMARTGOLF.

CUSTOM GOLF LESSONS

It provides a slightly more lenient golf swing error range for beginners and more sophisticated swing data for professionals.

SMARTGOLF provide golf lessons that allow you to learn step by step from basic movements based on physical principles according to your golf skills in Metaverse.

SMARTGOLF AI ANALYZER

The SMARTGOLF AI Analyzer has a short club length for indoor practice, but the 30cm strap on the head and LEDs allow for correct addressing and impact.

Silicon on the head and grip are designed to help with safety and prevent slipping even without gloves. Swings with this club are automatically recorded and analyzed using machine learning techniques to lead to scientific coaching.

**SMART
GOLF**

GOLF IS SCIENCE.

.....

MOBILE GOLF PRACTICE

- Continuous practice is required for the desired shot in a great field.
- Based on sophisticated swing data, you can play 350 real golf courses in Korea, Japan, and the US.
- Swing at home, in the yard, or in the indoor hallway with 3D real field.

.....

TRAINING EQUIP RECOMMEND BY PGA TOUR PRO

Developed with numerous golf pros, accumulated data, and collaborated with PGA players from 2021 to tune the data. 'Steve Jurgenson', a 2023 PGA tourist and winner of the New Hampshire Open and Massachusetts, said that SMARTGOLF is an effective tool for golf swing practice.

Make your own golf swing with the AI algorithm learning method developed by SMARTGOLF. When analysis is difficult, you can get help from a AI coach provided by SMARTGOLF.

"Effective tool for understanding the dynamics and mechanics of a golf swing"

.....

MOBILE GOLF SIMULATOR

- Screen golf course anywhere with a 73cm short club
- Equipped with a patented 30 cm leader strap that complements the demerits of the short-length swing trainer
- Check the correct impact with the impact sound of the strap
- Sophisticated swing analysis, ball trajectory simulation, and AI coaching

.....

GET 2 : GOLF SKILLS IMPROVEMENT AND FUN

- If you just hit the ball without analytical practice, your skills will not improve.
- Swing with a toy game will ruin your swing form even more.
- SMARTGOLF provides scientific analysis and AI coaching, but also has fun.

You can enjoy improving your skills by grasping only with a practice swing using the SMARTGOLF club without connecting to the app.

If you use the app, you will receive AI coaching and enjoy network games on the golf courses.

"SMARTGOLF AIX has been tested and approved by a team of PGA Pros"
